

Experiment-3

Aim: Create a HTML page with different types of frames such as floating frame, navigation frame & mixed frame.

Code:

Floating frame

```
<html>
<head>
<title>contact</title>
<body>
<iframe src="inline.html" height="350" width="400"></iframe>
</body>
</html>
```

Navigation frame

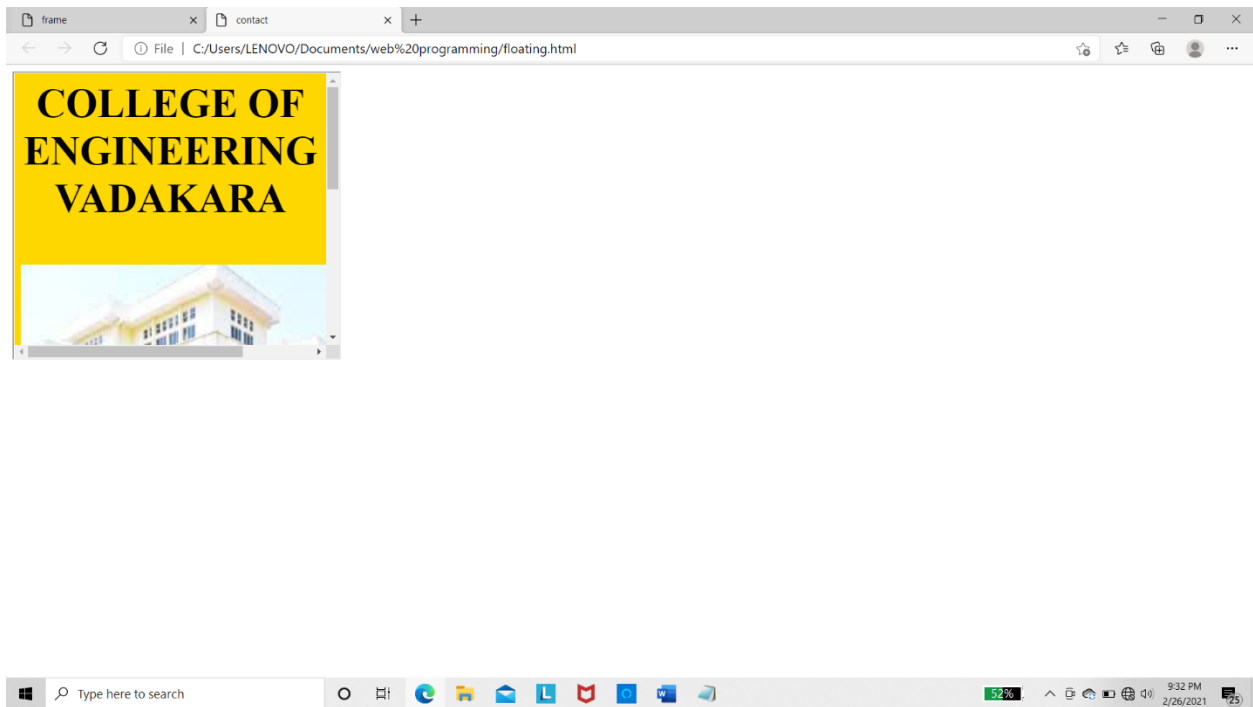

```
<html>
<head>
<title>frame</title>
</head>
<body bgcolor="pink">
<nav><br>
<a href="basictags.html"><h1>Home</a><br>
<a href="form.html"><h1>Register</a><br>
<a href="inline.html"><h1>website</a><br>
</nav>
</body>
</html>
```

Mixed frame

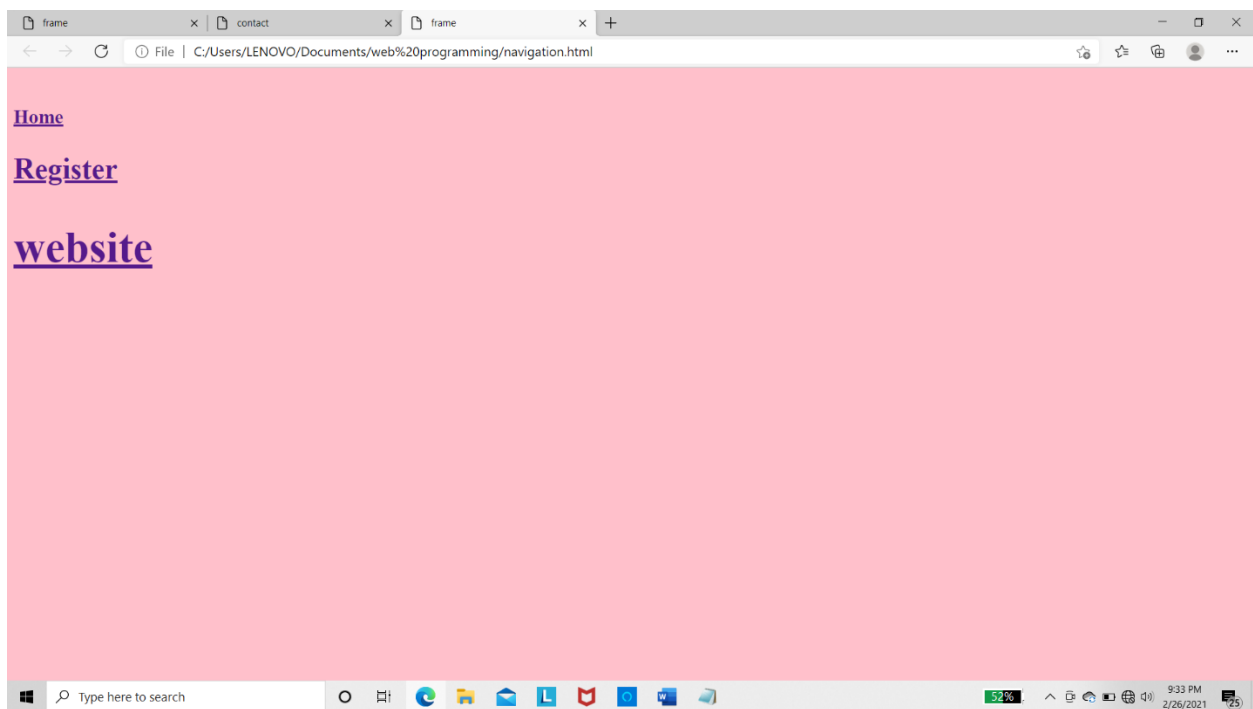

```
<html>
<head>
<title>frame</title>
</head>
<frameset cols="30,70">
<frame src="navigation.html">
<frameset rows="60,40">
<frame src="floating.html">
<frame src="imagehotspot.html">
</frameset>
</frameset>
</html>
```

Output:

Floating Frame

Navigation Frame

Mixed Frame
