

Experiment-9

Aim: Evaluating JavaScript Event Handling for every click of a button to change the background color of a HTML page

Code:

```
<html>

<head>

<link rel="stylesheet" href="switchcolor.css">

</head>

<body>
<center>

<h2>Changing background colour</h2>

<button>change color</button>

<script>

  var color=["red","blue","green","yellow"]

  var i=0;

  document.querySelector("button").addEventListener("click",

  function(){

    i=i<color.length ? ++i : 0;

    document.querySelector("body").style.background = color[i]

  })

</script>

</center>

</body>

</html>
```

Output:

Changing background colour

change color

Changing background colour

change color
